COMPANY OVERVIEW

At Bioflex, we are proud to be an all-Australian owned and run company, manufacturing sports nutritional supplements of the highest quality standards since 2006. Our motivation to provide the best nutritional supplements available ensures we stay ahead of the competition when it comes to the development of some of the most pure and ground-breaking products on the market.

We utilise local ingredients whenever possible and manufacture and package all products in our own manufacturing facility. This means we are in total control of what goes into our products and can guarantee you are receiving the best quality sports nutrition supplements on the market at the best possible price **resulting in better returns for your business!**

All of our products are completely free of fillers and by including only the very best ingredients we proudly bring to the market **Australia's purest range of sports supplements.**

We have a range of supplements to match the needs and support the goals of all individuals, from a comprehensive protein range to more specialised products to assist in fat loss, weight gain, recovery and beyond. Our comprehensive range is also suitable for both men and women from all sporting walks of life, from the 'weekend warrior' to the more serious athletes looking to get an advantage over the competition.

WHY CHOOSE BIOFLEX?

There are some very good reasons why becoming a reseller of Bioflex nutritional supplements will work for you, here's just a few;

- Our range is great for both men and women and suitable for individuals from all exercise and sporting backgrounds, from the competitive athlete to the person just wanting to improve their health or lose those extra kilo's.
- We consistently offer you the best possible value for money both in terms of the quality of our products and the affordability of the range. This means not only will you get better marginal returns from selling our products but also provide your customers with a great range of products at some of the best prices on the market.
- As we source, manufacture, package and distribute all of our supplements we can assure you that what you are receiving is of the highest quality and purity. In doing this we also pass on the savings as we cut-out the middle man who would usually just add to the cost of the products without adding any value.
- All Bioflex formulas are completely original. We don't copy other brands and have developed every formula ourselves. We researched the market for years before coming up with what we thought was the most cutting edge, high quality but cost effective range of supplements available. This gives you a supplement range with a clear competitive edge.
- Being the manufacturer, wholesaler and distributor of our product range, you will be dealing with the people who know the product range best and can provide you with the best support and advice available.
- As a result of dealing direct with the manufacturer we can also offer you some great incentives for stocking our product – for details read on!

HOW CAN THIS WORK FOR YOU?

As a reseller of the Bioflex Product range there are some fantastic benefits;

Our Marketing Effort – At Bioflex, we realise that having high quality products at competitive prices is nothing if company awareness is low. For this reason we have been and will continue to be very active in the market supporting sports ranging from national bodybuilding shows to local sporting clubs all around Australia. We have been the major sponsor of national shows from the IFBB, INBA, ANB and NABBA federations in bodybuilding and figure since 2007, the major and sole sponsor of Powerlifting Australia, and the major sponsors of the Tasmanian Junior AFL league and continually looking expand on this. We also sponsor a vast array of athletes from a range of different sports from figure/fitness and bodybuilding to motocross. These deals give us access to thousands of members across Australia and we are always well represented at their promotions and events. Additionally, we participate yearly in FITX and FILEX, 2 of Australia's largest healthy living expo's.

We are also very active in the media with advertisements appearing monthly in many of Australia's biggest health & fitness lifestyle magazines including Alpha, Ironman Australia, Women's Health & Fitness, Inside MMA and Hardcore Aussie Muscle.

In the online arena, we feature prominently on many of the top forums and have a large database of loyal customers waiting to hear from you. Our website has a visitation of 20,000+ visitors monthly and growing rapidly.

At Bioflex, we are also always pleased to support our resellers with point-of-sale materials that they may require and will provide these as part of the service. This will ensure that you get the best out of our range and support your efforts in getting better returns from one of the best sports nutritional ranges on the market – Bioflex.

As part of being a member of resellers of the Bioflex range we are always happy to see how our efforts can work best for you and more than happy to speak about benefits you can take advantage of in our marketing efforts.

You deal directly with the manufacturer – As you know, we source, manufacture and distribute all of our range which means you deal with the one supplier, no middlemen! We know our range best and can guarantee that you are receiving the absolute best quality supplements at the best possible price. We are a wholly Australia owned company with no outsourcing which means better service and advice for you.

Exclusive incentives – At Bioflex we want to provide you with the best possible options for ordering and as a result of being the sole distributor as well as manufacturer, can offer you the following exclusive incentives;

- Free shipping for orders above \$1000*.
- Sample packs will be available from 1st July 2011. (Sample pack to include 50 DL Brochures and 20 product samples). First orders after 1st July will receive a sample pack and from then on all orders over \$1,000 in value will receive 1 x sample pack for each \$1000 spent (e.g. \$2000 receives 2 x sample pack, \$5000 receives 5 x sample pack). Orders of \$5,000 or more will also receive a box of 25 shakers and 50 bags.
- We will support all resellers where possible with point-of-sale materials and threshold marketing opportunities free of charge.
- Our belief in our product offerings allows us to offer first time stockists the opportunity to stock the Bioflex Nutrition range for a 'honey moon' period of 90 days where you can return any unsold product after this period without any commitments for a full refund if you are not satisfied with the range.

* orders under \$1000 will incur a flat shipping rate of \$29.

*^ orders under \$5000 will be pre-paid.

PRODUCT RANGE

At Bioflex, we manufacture and deliver products that are completely free of fillers and by including only the very best ingredients we proudly bring to the market **Australia's purest range of sports supplements**. From our protein range and weight loss products, to our pre and post workout formulas, our range is unmatched in terms of quality and purity, with many being very clear market leaders. Bioflex is quite unique in that we manufacture all our product lines at our own registered manufacturing facility, and by including no third parties we can guarantee complete quality control which few other companies can.

Look out for the following icons to guide you through what these supplements best address;

MUSCLE & STRENGTH

These products assist in building lean muscle, can aid in bulking up and help you increase strength gains. They can also assist in maintaining lean muscle mass.

SPORTS RECOVERY

Products with this icon aid in the body's recovery process from exercise and ensure you can train another day.

WEIGHT LOSS

Great for changing your body composition so you can get ready for that competition, holiday or just the trip to the beach. These products will help you tone up and shift excess body fat.

100% AMINO ACIDS

All available in 500g and 1 kg containers

BCAA PRO

BCAA PRO COMBINES THE THREE ESSENTIAL AMINO ACIDS, LEUCINE, ISOLEUCINE AND VALINE, COMBINED AT WHAT IS UNIVERSALLY RECOGNISED AS THE IDEAL RATIO OF 2-1-1.

100% Free form BCAA's

Rapid absorption

Maximum recovery

Great for strength athletes and those looking to increase lean muscle mass

May assist in fat loss

Our BCAA's are 100% pure and of the highest pharmaceutical grade. BCAA's (Leucine, Isoleucine and Valine) play an important role in protein resynthesis, leading to strength and muscle growth and more rapid recovery. It has been suggested that incorporating free form Branched Chain Amino Acids will lead to better net results around training time as they are more quickly absorbed and bioavailable than amino acids sourced from protein.

All people / athletes from strength to endurance can benefit from incorporating BCAA Pro into their dietary routine. As intense training sessions require more energy and utilise proteins / amino acids during the exercise, it's essential that these are replaced in order to aid in the recovery process. This product is suitable for both men and women alike.

Directions:

For best results, consume 10g-15g directly after your workout.

Dosage:

A typical dose is 10 grams.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

Leucine, isoleucine and valine.

CREAFLEX

**100% PURE
CREATINE OF
THE HIGHEST
QUALITY.**

100% Pure Creatine Monohydrate

Micronised to 200 mesh for rapid absorption

Increase muscle volume

Optimises strength gains

Great for strength and endurance

Creatine Monohydrate is perhaps the worlds most widely used supplement, being proven through hundreds of research studies. Our Creaflex is of the highest pharmaceutical grade and has been micronised to 200 mesh for better absorption and ease for mixing in liquid. Creaflex is recommended as the first choice for those looking for a supplement that can increase strength, muscle size and assist endurance.

Although creatine offers an array of benefits, most people think of it simply as a supplement that bodybuilders and other athletes use to gain strength and muscle mass. Nothing could be further from the truth.

Some studies have found that creatine may increase growth hormone production too which means it will have life enhancing qualities as well as further reinforce its ability to help increase muscle mass and strength.

Vegetarians and those who eat little meat will also benefit from creatine supplementation, as they receive minimal creatine from their regular diet.

Directions:

For best results take 3 - 10g of Creatine Monohydrate 30 minutes prior to training. In the first few weeks of use a larger "loading" dose may be beneficial.

Dosage:

A typical dose of Creatine Monohydrate is between 3 and 10g.

Note that a flat 5ml scoop provided of Creatine Monohydrate is equal to 3.3g.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

100% Pharmaceutical grade Creatine Monohydrate.

GLUTAFLEX

**100% PURE
GLUTAMINE GREAT
FOR ALL WHO
EXERCISE REGULARLY
AND WANT TO
RECOVER FASTER!**

100% L Glutamine

Assists recovery and immune function

Increases nitrogen levels

Anti-catabolic when dieting

Great for both men and women

L Glutamine is one of the bodies' most abundant amino acids and is one of the favourite supplements of strength trainers, intensive exercise athletes and others who generally exercise a lot. After intense training the body's levels of this important amino acid can be depleted so supplementing with Glutamine can be crucial. It is particularly recommended for those who want to preserve muscle while dieting and can be especially important for those who put a lot of stress on their immune and muscular systems with intensive exercise.

Our Glutamine is of the highest pharmaceutical grade and is 100% pure.

The donation of carbon is a vital role Glutamine plays in the body's recovery process. As a carbon donor, glutamine is "muscle food," helping to replenish glycogen stores after and during exercise. Glutamine also has another important function as a nitrogen-donor. Strenuous exercise such as weight lifting causes micro-injuries to the muscle tissue. By donating nitrogen, glutamine helps build proteins and repair the muscle,

as well as help build up more muscle - meaning you will recover faster from workouts reducing that soreness feeling. Part of this muscle-recovery action may be due to its ability to induce the release of growth hormone.

But muscle isn't the only tissue where protein is being synthesized. Since it can very easily donate nitrogen, it functions as a "nitrogen shuttle," delivering nitrogen wherever it is needed. It's for this reason the use of glutamine has been documented to help the survival of severely ill, surgical patients and others such as burn victims. It also speeds up wound healing, and improves recovery in general. Glutamine can also enter the Krebs cycle and serve as a non-carbohydrate source of energy. In fact, this is the main way it usually contributes to the production of energy in our muscular system.

Directions:

Have once daily before or immediately after training. Benefits are also had when consuming GlutaFlex late at night before sleeping.

Dosage:

We recommend a dosage of between 5 and 10g (one to two teaspoons).

Suitable for:

Men, Women, Strength and Endurance Athletes.

Ingredients:

L Glutamine (100% pharmaceutical grade).

PRE & POST TRAINING AMINO FORMULAS

Recover X and BioCharge are available in lime, orange and raspberry and all products are available in 500g and 1 kg sizes

BIOCHARGE

BIOCHARGE IS OUR CUTTING EDGE FORMULA DESIGNED TO PREPARE YOUR BODY FOR THE MOST INTENSE TRAINING SESSIONS.

Revolutionary pre-workout formula

Performance aminos

Caffeine and DMAA for focus

Contains absolutely no carbohydrates

Hydration Matrix

Creatinol Phosphate

Suitable for men and women

Biocharge contains ingredients that will help you maintain maximum mental focus throughout your workout, while increasing muscular pumps, assisting recovery and endurance. We have developed what we feel is by far the most potent pre-workout product available on the market.

BioCharge combines Caffeine, Geranium Extract, Citrulline Malate, Arginine, Beta Alanine, Creatinol Phosphate, ATP, Phenylalanine and Acetyl Tyrosine to maximise training performance, strength and focus, while Glycerol Monostearate and our electrolyte formula cover the bodies hydration requirements. BioCharge contains absolutely no impurities, or carbohydrates making it one of the world's purest pre workout formulas. The combinations of ingredients in BioCharge were chosen to work in synergy for maximum effect. BioCharge is so pure it is effective in a dose as little as 10g.

Directions:

For best results drink with 250ml's + of water directly before training. We recommend taking it 10 minutes before training to maximise workout performance.

Dosage:

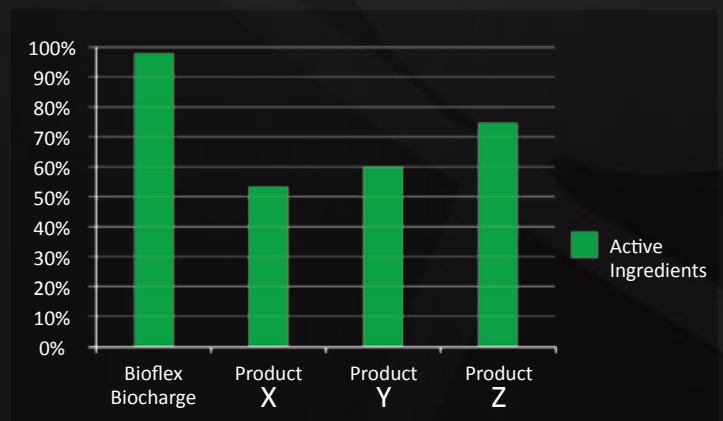

A typical dose for this product is 10g-15g

Suitable for:

Men, Women, Strength and Endurance Athletes.

Ingredients:

Beta Alanine, Arginine, Citrulline Malate, Creatinol Phosphate, Glycerol Monostearate, Phenylalanine, Acetyl Tyrosine, Flavour, Magnesium, Potassium, Caffeine, Sodium, Calcium, DMAA, Niacin, Sucralose.

Comparisons are made against 3 of the most popular comparable products on the market.

CREAFLEX ATP

BIOFLEX'S ULTIMATE CREATINE MATRIX!

Ultimate Creatine Matrix

Creatinol Phosphate

Creatine Tri Malate

Pure synthesised ATP

Zero carbs, fats and fillers

We believe Creaflex ATP is the purest and most effective Creatine system on the market today. Our unique blend of Creatinol Phosphate, Creatine Tri Malate, Creatine Monohydrate, Leucine and Adenosine Tri Phosphate have been included in this revolutionary product designed to assist training intensity, endurance, strength and muscle size. We have developed this blend as the ultimate form of Creatine that should give users results above what they have previously gained from isolated Creatine monohydrate.

Creatinol Phosphate is used as it has nil conversion to creatinine and is effective in prolonging anaerobic glycolysis, Creatine Tri Malate is the most rapidly absorbed form of Creatine while Creatine monohydrate is included due to its proven results over years of research. The amino acid Leucine is added to increase protein synthesis and creatine utilisation further with the actual molecule Adenosine Tri Phosphate included to assist energy production.

Creaflex ATP is completely free of carbohydrates and sugars.

Creaflex ATP is unflavoured.

Directions:

Have once daily before or immediately following exercise. For best results have in conjunction with a simple carbohydrate source. When starting a creatine cycle, an increased "loading" dose up to 20g a day may be beneficial during the first week.

Dosage:

A typical dosage for this product is from 5 - 15 grams.

Suitable for:

Men, Women, Strength and Endurance Athletes.

Ingredients:

Creatinol Phosphate, Creatine Tri Malate, Creatine Monohydrate, Leucine, Adenosine Tri Phosphate.

RECOVER X

**OUR REVOLUTIONARY
INTRA AND
POST-WORKOUT
SUPPLEMENT GREAT
FOR MEN, WOMEN
AND PEOPLE FROM
ALL EXERCISE
BACKGROUNDS.**

98% Free Form Aminos

All 9 Essential Amino Acids

High % of BCAA's

Glutamine, Tyrosine, Citrulline Malate

**Revolutionary product that can be used
during exercise to aid recovery**

Increase endurance

Zero Carbohydrates and Fats

Recover X may well be the worlds purest Essential Amino Acid Recovery Formula. Combining all 9 essential aminos acids, with conditionally essential glutamine and tyrosine as well as citrulline malate it has been formulated at precise ratios for maximum absorption, muscle repair and recovery, with absolutely no fats, carbohydrates or impurities.

Recover X is the ultimate recovery product developed with both the most serious athletes to the regular exerciser in mind. It's revolutionary blend of essential amino acids is best taken during or immediately following gruelling training sessions or events for best results.

We dare you to find a more complete during or post-exercise product, we're sure you won't be disappointed!

Directions:

For best results, consume 20 grams during and / or directly after your workout.

Dosage:

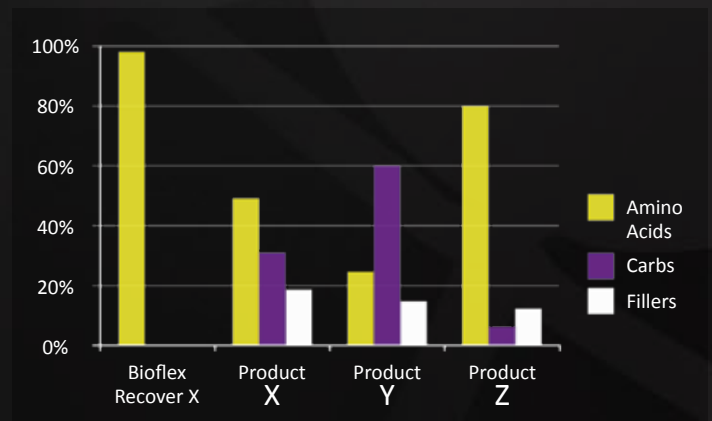

A typical dose is 20 grams.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

Glutamine, Leucine, Citrulline Malate, Lysine, Tyrosine, Valine, Theronine, Isoleucine, Methionine, Phenylalanine, Histidine, Tyrtptophan and Cysteine, Flavouring, Sucralose.

Comparisons are made against 3 of the most popular comparable products on the market.

ENCAPSULATED PRODUCTS

Available in bottles of 120 capsules

ALPHA

**ALPHA IS OUR
REVOLUTIONARY MALE
SUPPORT PRODUCT
AVAILABLE FOR ALL
OF THOSE WHO WANT
TO BE THE
ALPHA-MALE!**

Maximum Male Support

Boost Testosterone

Minimise Oestrogen

Increase strength and focus

Ideal for men

Alpha combines the strongest herbal extracts available which have long been used for male support. D - Aspartic Acid, Tribulus Territras, Tongkat Ali, Avena Sativa and Fenugreek are said to assist luteinising hormone and DHEA levels while DIM and Zinc are added to for their anti aromatase qualities. This product is ideal for men looking to support and boost their testosterone levels which in return assist in increasing strength, virility, stamina and focus.

Directions:

Take twice a day at meal times, in the morning and evening.

Dosage:

A typical dose is one to two capsules taken twice daily.

Suitable for:

Men, strength and endurance athletes.

Ingredients:

D Aspartic Acid , Tribulus Territras, Tongkat Ali (Eurycoma Logifolia), Avena Sativa, Fenugreek, diindolylmethane (DIM), Zinc. Capsules contain gelatin.

Mega 2

IF YOU ARE LOOKING FOR MAXIMUM STIMULATION TO HELP GET YOU THROUGH, THEN MEGA 2 IS FOR YOU!

Maximum Stimulant Matrix

Geranium Extract

Pre-workout boost

Caffeine Anhydrous

Combining some of the most powerful stimulants, Mega 2 contains Caffeine Anhydrous and 1,3 dimethylamylamine (DMAA) and is a must for anyone looking to get through some of the most gruelling workouts. Mega 2 is perfect for increasing intensity and focus in training especially when fatigue is an issue.

Please note that due to its very powerful effect, the DMAA in this product is not suitable for drug tested athletes competing in WADA tested events.

Directions:

Take twice a day at meal times, in the morning and evening.

Dosage:

A typical dose is one to two capsules taken twice daily.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

Caffeine Anhydrous, Geranium Extract (DMAA). Capsules contain gelatin.

RIPPED

DESIGNED WITH MAXIMUM FAT LOSS IN MIND!

Assist Lean Muscle Retention

Ideal for fat loss

Minimise Fat Stores

Increase Thermogenic Effect

Maintain Energy Levels

Ripped has been designed incorporating the most effective ingredients for blasting fat and retaining muscle. Our extracts of Green Tea and Sesamin are of the strongest available and combined with Caffeine, Citrus Aurantium and Chromium Picolinate should assist those with even the largest goals to provide maximum impact. If your looking to lose those unwanted kilo's you can't go past Ripped!

Directions:

For best results have twice a day. Those who combine Ripped with a calorie controlled diet low in carbohydrates will see much more rapid results.

Dosage:

A typical dose is 1 - 2 capsules twice per day. Those who have problem sleeping should consume the last dose well before bed time.

Suitable for:

Men, Women, Strength and Endurance Athletes. As Ripped contains Chromium Picolinate it should be avoided by diabetics.

Ingredients:

Green Tea Extract, Sesamin Extract, Caffeine, Citrus Aurantium Chromium Picolinate. Capsules contain gelatin.

PROTEIN RANGE

All protein products are available in Chocolate, Vanilla, Banana and Strawberry in 750g, 1.5kg and 4kg sizes.

BIOBULKER

BIOBULKER IS OUR ALL IN ONE MASS GAINING PRODUCT PERFECT AFTER TRAINING.

Protein/Carb Blend for maximum muscle growth

Hydrolysed WPI for maximum purity

Boosted with BCAA's, Creatine, Glutamine, AAKG, Beta Alanine

Great for individuals looking to increase body mass

Suitable for both men and women

46.6% P, 1.4% F, 43.6% C

BioBulker is our all in one mass gaining product designed to maximise protein synthesis and muscle recovery. It combines high and low molecular weight carbohydrates, rapid and slow released protein sources (including Hydrolysed WPI) as well as free form Amino Acids, AAKG, Beta Alanine, Glutamine and Creatine. If you are looking for an all in one product which will bring maximum gains, assist recovery and aid in improving your performance BioBulker should be your first choice.

Simple carbohydrates maximise insulin promotion directly after a workout, as when insulin levels are raised, glucose and protein can be transported directly to muscle cells much more effectively. Post workout, protein synthesis can be elevated by more than 50% when combined with simple carbohydrates, so during this time its critical to take a combination of high quality quickly absorbed carbohydrates and proteins – it's for this reason we have created this innovative blend.

Directions:

It is highly recommended Bio Bulker is consumed within 1 hour of finishing a workout. For those who demand rapid mass gains, Bio Bulker can be taken twice daily.

Dosage:

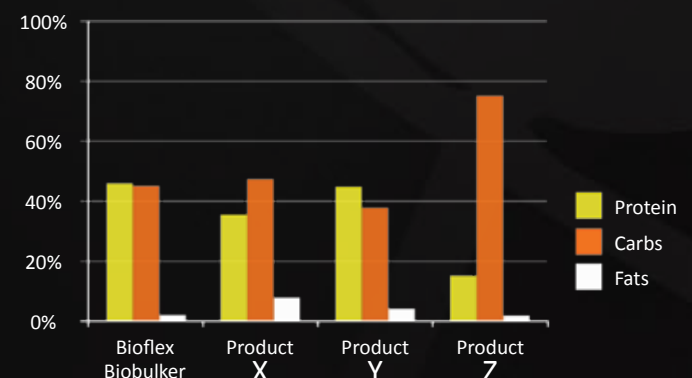

For optimum results consume 60 grams (two level scoops) of Bio Bulker in 500ml's of water or milk.

Suitable For:

Men, Women, Athletes, Weight lifters, Dieters.

Ingredients:

Cross and Ultra Filtered Whey Protein Isolate, High Molecular Weight Barley Starch, Cross Filtered Whey Protein Concentrate, Hydrolysed Whey Protein Isolate, Maltodextrin, Flavouring, AAKG, Glutamine, Creatine, Beta Alanine, Sucralose (955).

Comparisons are made against 3 of the most popular comparable products on the market.

HYDROFLEX

**IDEAL FOR THOSE
THAT DEMAND THE
FASTEST POSSIBLE
RECOVERY AND
MAXIMUM MUSCLE
GROWTH!**

- Maximum Muscle Growth and Recovery**
- Perfect Pre or Post Training**
- Pre Digested Peptides for rapid absorption**
- Hydrolysed Caseins and Isolates**
- Great for men and women**
- Ideal for dieters**
- 90% P, 1.0% F, 0.9% C**

Hydroflex is one of the purest protein sources available, utilising only the highest quality Hydrolysed Whey Protein Isolates, Casein Hydrolysates, Cross and Ultra Filtered Whey Protein Isolates. This combination provides the highest amounts of pre digested peptides, the lowest amount of fats and carbohydrates, while preserving the most ideal amino acid ratio for the those looking for maximum muscle growth and recovery. Hydroflex is extremely high in branched chain, essential and non essential amino acids.

Hydroflex is most suited for those who require the purest source of rapidly absorbed and pre digested proteins, which makes Hydroflex ideal before, during or directly after strenuous training sessions or competitive events.

Directions:

Consume directly after training for maximum nutritional benefit, or anytime during the day for a low fat meal replacement.

Dosage:

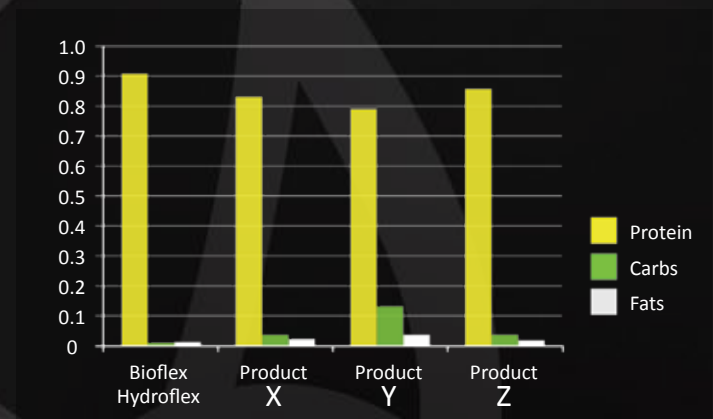

Mix 30 grams (one level scoop) with water, low fat milk or juice.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

Hydrolysed Whey Protein Isolate, Casein Hydrolysates, Cross and Ultra Whey Protein Isolate, Flavouring, Sucralose (955).

Comparisons are made against 3 of the most popular comparable products on the market.

BIOFURNACE

TURN YOUR BODY INTO A FAT BURNING FURNACE WITH BIOFURNACE!

Fat Burning Protein Matrix

10 powerful fat metabolising ingredients with WPI for lean muscle retention

Casein for maximum satiation

Great for men and women

89.2% P, 1.0% F, 0.8% C

BioFurnace is Bioflex's optimised fat burning protein matrix, perfect for those who are looking for the most effective fat burning, muscle preserving product available. It is ideal for those looking for rapid weight loss, from dieters to competitive bodybuilders preparing for events.

BioFurnace contains only the purest protein sources, Cross and Ultra Filtered Whey Protein Isolate has been used as it is extremely low in fat and carbohydrates while being very high in branched chain, essential and non essential amino acids, while Calcium Caseinate is included as it has positive effects on reducing hunger as well as it's ability to reduce the bodies absorption of dietary fat.

Optimising the perfect protein combination is no less than 10 ingredients which all help to assist fat loss.

Acetyl Carnitine, Green Tea, Sesamin, Citrus Aurantium, Inositol, Caffeine, Vitamin B5, Hydroxy Citric Acid, Choline and Chromium Picolinate have been added to aid the bodies ability to oxidise fat, increase thermogenesis, increase fat oxidation, decrease fat storage, and increase ketone formation which together with our protein combination will help the body become a fat burning furnace.

Directions:

If exercising have once daily directly after exercise. For those who are dieting, it's recommended replacing one to two meals a day with a serving of BioFurnace. For best results, mix with 300ml's of water or low fat milk.

Dosage:

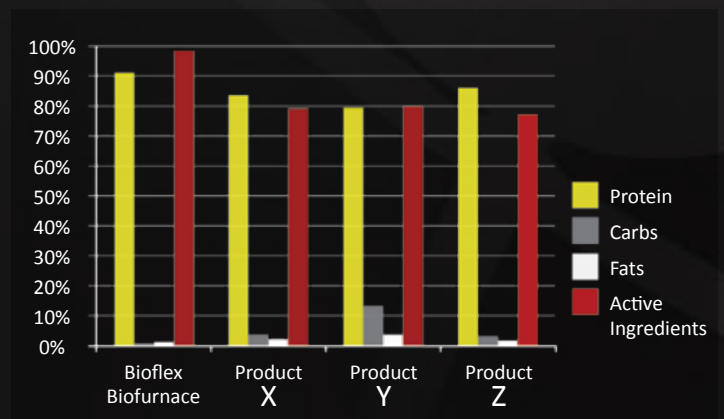

One level scoop, 30 grams.

Suitable for:

Women and men from all sporting / activity backgrounds and dieters.

Ingredients:

Cross and Ultra Filtered Whey Protein Isolate, Calcium Caseinate, Flavouring, , Acetyl Carnitine, Green Tea, Sesamin, Citrus Aurantium, Inositol, Caffeine, Vitamin B5, Hydroxy Citric Acid, Sucralose (955), Choline and Chromium Picolinate.

Comparisons are made against 3 of the most popular comparable products on the market.

PROFLEX

PROFLEX IS OUR MOST POPULAR PROTEIN THAT IS SUITABLE FOR A WIDE RANGE OF APPLICATIONS FROM ATHLETES TO THOSE LOOKING TO DIET. GREAT FOR BOTH MEN AND WOMEN.

Sustained Release Recovery Protein

Ideal for night or day use

WPI and Hydrolysates for maximum BCAA's

Casein for prolonged absorption

Ideal for men and women looking to supplement their diets

Up to 75% less carbs & fats than many other comparable products on the market

Great for dieters

85% P, 3.7% F, 2.9% C

Proflex is a 100% Sustained Release Protein Blend incorporating Cross Filtered WPI, Cross Filtered WPC, Calcium Caseinate and Casein Hydrolysates. This protein combination is ideal for those who want a sustained release protein that will feed the muscles for up to 10 hours, assisting anabolism and minimising catabolism (muscle wastage). Rich in all essential amino acids and a high concentration of branched chain amino acids, it's the perfect choice for those that demand a versatile protein, great for anytime of the day: after a workout, in the morning or even before bed. If you only consume one protein product then Proflex should be your first choice as it is suitable for any time of the day or night for men, women, general dieters or athletes looking to maintain and build lean muscle.

Don't be fooled by the price of Proflex against its competitors, even though it's more affordable than most simple protein blends, this high quality product delivers a protein content that is over 10% higher than many other leading brands, while its fat and carbohydrate levels are up to 75% less.

For this reason we feel that Proflex is Australia's best value flavoured protein product, and the most suitable product for those wishing to find a high quality, total protein supplement for any purpose.

Directions:

For those involved in intense exercise and weight training, we recommend consuming Proflex twice daily.

Dosage:

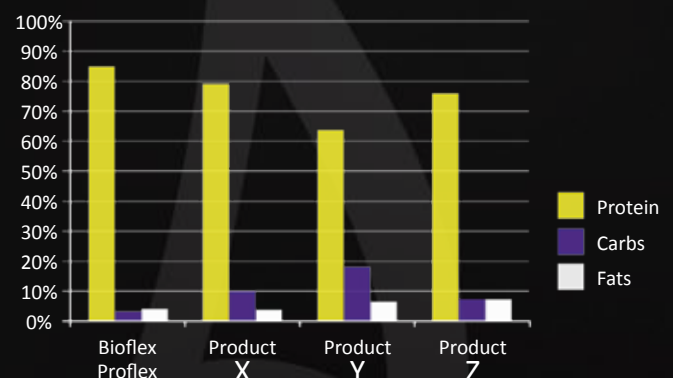

Mix 30 grams (one scoop) with juice, water or low fat milk. If using a cup, stir well. For best results use a shaker.

Suitable for:

Men, women, strength and endurance athletes.

Ingredients:

Cross Filtered Whey Protein Concentrate, Cross and Ultra Filtered Whey Protein Isolate, Calcium Caseinate, Casein Hydrolysates, Flavouring, Sucralose (955).

Comparisons are made against 3 of the most popular comparable products on the market.

PRODUCT APPLICATIONS & STACKS

As a company that designs superior quality supplements for a range of sporting and lifestyle applications, we endeavour to provide you with useful information about the products that would work best for your customers. Below are some advised products for athletes and enthusiasts from a range of backgrounds;

Supplements for the Endurance Enthusiast (Runners, Triathletes, Cyclists);

The endurance athlete requires nutritional supplements that will ensure that they can fuel their body over long exhausting periods of time. They also must ensure they can recover from these long gruelling workouts. Bioflex offers a range of supplements that will assist in this.

**BCAA Pro
Glutaflex
Recover X
Alpha
Mega 2
Proflex**

Supplements for the Strength Trainer (Football Players, Bodybuilders, Weightlifters, Gym enthusiasts)

These supplements will assist the body in gaining strength, lean body mass, can aid in bulking up and the maintenance of lean muscle.

**BCAA Pro
Creaflex ATP
Glutaflex
Biocharge
Alpha
Hydroflex
Proflex**

Supplements for the weight loss customer

Changing your body composition can be a challenging goal. We at Bioflex have a range of products that will aid in shifting those extra kilo's, maintain your lean body mass and help your customers achieve the shape they are looking for.

BCAA Pro
